

Submitter: David Wall  
On Behalf Of: Mr Oregon SUPPORTS SB 1567  
Committee: Senate Committee On Energy and Environment  
Measure: SB1567

Monday; [02.08.22]

I STRONGLY SUPPORT [SB1567]!

First, I would like to express my sincere gratitude to the submitters of Testimony on this much needed and unacceptably overdue piece of legislation.

I have only lived in Oregon (Yamhill County just outside Newberg) for six years and 'Oregon's Critical Energy Infrastructure (CEI) Hub is a good reason to get ready to move out of here as quickly as possible.

How is it possible the CIE HUB was allowed to grow in complexity without the slightest regard for safety; to people, homes, the environment and the economy of Oregon without stringent ongoing governmental oversight?

The 'Storage Tanks' should have been replaced years ago. What about the integrity of the underground pipelines? Any leakages into ground water or the Willamette?

Oregon's CIE Hub should come under immediate and thorough regulatory scrutiny with mandatory rebuilds and relocation from liquefaction zones.

David S. Wall

Mr. Oregon Concurr-I'm going to get out of here too.
