

Submitter: David Wall
On Behalf Of: Mr Oregon supports STEM
Committee: Senate Committee On Education
Measure: SB1590

Tuesday; [02.08.22]

I OPPOSE [SB 1590].

I vehemently support STEM and computer science education and incorporation as a graduation requirement.

The problem I have with [SB 1590] is the dismal five-year study and implementation plan.

Educators could be implementing computer science and STEM this summer if they had the support from the Legislature.

Oregon students are falling further and further behind.

The Legislature should stop the slide into substandard education, allocate the required resources get moving towards success.

David S. Wall

Mr. Oregon Concurr-STEM and computer science education waits for no-one.
