

Submitter: Stephen Mangold

On Behalf Of:

Committee: House Committee On Rules

Measure: HB4133

This allows someone from Vancouver, Was, to register for Oregon. In order to determine if a social security number belongs to someone that currently lives in Oregon is to have an address, po box, etc. How are you making sure that someone from California or Washington isn't already registered? Who are these third party organizations? Are you going to share the electronic signatures and SS numbers with surrounding states to determine all of this?
