

Submitter: Craig Swanson  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HB4133

Vote NO on HB 4133.

HB 4133 opens up huge potential for fraud beyond what is already very pathetic election security and integrity. If this is passed, I do not see how any thinking person is going to regard Oregon elections as anything but very likely to be fraudulent. It would seriously degrade trust in elections in the state.

Having a social security number says absolutely nothing about a person being able to legally vote in Oregon.

- 1) Theft of social security numbers is already a significant problem. This legislation will further incentivize social security number theft and enable further means of exploitation of such theft.
- 2) There are many people in Oregon who are not US citizens, and whom therefore cannot legally vote, but who do have social security numbers. This legislation would encourage and enable these people to vote illegally, even if they did not intend to break the law.
- 3) By far most of the population of the US has social security numbers but are not Oregon residents and therefore should not be able to vote in Oregon. This bill makes it possible for those who are not Oregon residents to register to vote in Oregon elections.

Passing this legislation would be an indication that an illegitimate Oregon government plans to cement its illegal and illegitimate control by permanently authorizing and encouraging outright voter registration and election fraud.

No legal and responsible legislature member would vote for this bill. If you vote for it, you are making it clear you are intending to subvert the basic premise of free and fair elections, and therefore show you are against the Oregon and United State Constitutions.

Passing this bill would further push secession of many Oregon counties from state, and with very good reason.

Once again, vote NO on HB 4133.
