Submitter: Marcus Winston

On Behalf Of:

Committee: House Committee On Rules

Measure: HB4133

I Strongly oppose HB 4133. HB4133 is a completely misguided and disingenuous attempt to make "voter registration easy". Specifically, subsection 5 requiring an Application Programming Interface (API) will open up the voter registration system to incalculable fraud. Computer APIs are very simple to hack and misuse. I know this because I am, by profession, a computer engineer. Putting an API on the voter registration system is, quite simply, to open it up to untold fraud. The State would be negligent to allow such a thing. The only responsible action is to let this bill die in committee.
