

Submitter: Christina Buehler  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HB4133

I oppose HB 4133 allowing 3rd parties to register those with only Social Security Numbers and allowing for an electronic signature. I am opposed to allowing 3rd parties to register voters because this could increase fraud both for voters but also people pretending to register voters but are actually farming social security numbers with signatures to committee identity theft. I am also opposed to allowing people to provide only social security number because without the physical card to double check an error could cause another persons vote to be stolen even by accident as well as possibly the new registered person vote becoming invalid. I am opposed to collecting electronic signatures without valid check of id. This could really mess up someone's life having a signature of someone else associated with their ssn on a state data base, a devastating affect on banking and everything.
