

Submitter: Lisa Semling

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

The waves created by boats larger than allowed in this bill cause damage to river wildlife habitat. It also creates conditions which make it impossible for some groups to enjoy time on the river. I used to take children on the river to teach them stand up paddle boarding, but the waves generated by large boats make this too difficult and I can no longer continue.
