

Submitter: Amber Blazer

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4011

I oppose this bill. We as a state already spend too much money on supporting the outcast, downtrodden. Etc. how about instead we reallocate finances to help out these people from other programs? Howabout instead if just giving to them, howabout hold them responsible and if they dont comply to set standards remove it. Such as if they do drugs or commit crimes they they are booted away. Gifts without a way to create responsibility never taught a person to care.

Taxing an already burdened system for more money when the homeless and drug situation is being let run amock and out of control and without holding persons responsible for their own action is inhuman itself. Howabout if money is wanted tax entertainment studios? Howabout allowing business and trade to flourish without bossing them around and telling them to shut down in view of a "public crisis"? Allow free trade to continue and people and persons are more often inclined to control their own investments! Government is there to control lawlessness, not hinder those minding thier own business. **NO SALES TAXATION**
