Committee: Senate Committee On Energy and Environment

Measure: SB1589

I strongly oppose SB 1589. The Willamette River is a public waterway and should be available for all water enthusiast to use.

Subjecting only towed water sports enthusiasts to a weight limit is overtly biased. A 5,000-pound fishing boat can produce a similar wake to the same size tow boat.

Furthermore a 15,000 cabin cruiser that produces a wake far greater than any wake surfing boat can still operate freely under this legislation.
