

Submitter: Russ Axelrod

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

I strongly support efforts to minimize the cumulative adverse affects of river recreational activities on our river systems - especially sensitive aquatic and shoreline environments like the Willamette River upstream of Willamette Falls. I urge you to support SB 1589 limiting loading weights for recreational water sport towing activities as one small measure needed to help protect our rivers from the progressive degradation in the ecological conditions we've been experiencing. Please stand up to protect our rivers!

Sincerely,

Russ Axelrod

Former Mayor West Linn
