

Submitter: David Wall
On Behalf Of: Mr Oregon Opposes SB 1578
Committee: Senate Committee On Education
Measure: SB1578

Wednesday; [02.09.22]

I OPPOSE [SB 1578].

[SB 1578] is objectionable due to its' burdensome and oppressive; reporting, analysis and adjudication systems and may not achieve the purposes for which it is created.

The entire Public School system is in the throes of significant change-many parents will be opting out of the Public School system due to a myriad of reasons; chief amongst them are poor educational environments and content their children are not receiving.

The Public School system is collapsing on many additional fronts-hiring and retaining competent educators, education content (Critical Race Theory, etc.), shorter and shorter school hours, distant learning due to bad advice concerning the COVID pandemic and how to provide severely disabled students an equal education.

[SB 1578] requires much more thought than currently contained within the four corners of the documents so presented.

In addition, who pays for the enormously costly salaries and overheads required of [SB 1578]?

Will [SB 1578] be funded out of the Education Department or receive special funding to carry out its' mission?

[SB 1578] is a mess.

The current reporting system needs updating but, to the extent [SB 1578] is crafted?

Disabled student's educational needs predicated upon medical needs require reassessment to achieve an equal education .

David S. Wall
Mr. Oregon Concurr.
