

Submitter: Eric Hall

On Behalf Of:

Committee: Senate Committee On Natural Resources and Wildfire Recovery

Measure: SB1534

This is just yet another punitive measure designed to hurt certain people while not producing any measurable or meaningful results. There is nothing rational or coherent about this bill and thus there is no meaningful argument to be made for it. It can only be condemned as abuse of power and criminal negligence.

Carbon taxes are proven ineffective. The only reason to implement these types of carbon taxes and regulations is to help bloat state coffers and to hire more people who want environmental activist jobs in government.

Any person who supports or votes for this bill is either horribly ignorant or has actual malice for rural residents.
