

Submitter: Bruce Schilling

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

My family and I moved from living on Lake Lswego onto the river a year and a half ago to enhance our Water-sports activities. Particularly, wake surfing and wakeboarding. Additional ballast options were a significant component of our choice to move to the river.

The wake surfing zones on the upper Willamette already limit the areas where the most wave (boat weight) impact occurs and positively impacts the environment outside those zones.

Please don't further restrict my family's enjoyment of the river. In warmer months we are daily boaters.

Sincerely,

Bruce Schilling
