

Submitter: Scott Anderson

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

Dear Committee Members,

We are riverfront owners who own a boat that would be affected by the passage of this overreaching, self serving & vindictive Bill. It is unbelievable that here we are again 3 years in a row fighting for our rights to boat safely, responsibility & respectfully on our river ... eveybodys river. We have written thoughtful summaries of our position on this type of Bill 3 years in a row. My God please send the advocates of this Bill the same message you have sent 3 years in row. No No No. We are emotionally exhausted from this unending assault on our rights and our lives. It is despicable to come at us again after all we have done as a community to work with the proponents of this Bill. Training , Licensing, Certifications , Designated Surf Zones and more. Its never enough.

What new information have they provided to the committee to justify another vote on this? We surf and the volume of Boats on the river last year was very low. What incidents occurred to ban our boats off the river ? None. Right None. That would be my guess.

Please stop this group once and for all. If a lawmaker that lives on the river is behind this Bill it is a flagrant conflict of interest.

Sincerely

Scott & Marina Anderson

Thank you for reading we are frustrated and tired of fighting this group.
