

Submitter: Lynden Brown

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

This bill is one of the craziest things to come up. What do you think will power all our farm machinery and big trucks? Have you thought anything about fuel supplies to areas outside the Metro area? What are long haul truckers supposed to put in their tanks between Canada and Mexico or do they all just go around Oregon? Why are you trying to put Oregon Ag out of business?
