

Submitter: Robert Brown

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

We are all citizens of the state with equal rights to the water ways and usage. From the start these restrictions have been pushed by special interest and one sided. The Marine Board has shown its willingness to make rules based on influences from special interest and not in the name of all who use the water. There is a way forward that will allow everyone to share the Willemette not just those who have the ear of the Marine Board
