

Submitter: Cory Morgan

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

I oppose this bill for a number of reasons, primarily in that it prioritizes very special interests over the greater population river uses. I support regulation of our rivers so that we can all share, and I most certainly support education (through required permits to use the river). But scientifically speaking, I don't understand the arbitrary 5000lb limit, and I also don't understand the need to remove wake surfing from the already VERY limited sections of the river that allow it. Thank you for considering my input.
