

Submitter: Connie Barnes

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

I have lived in Wilsonville since 1988, moving there to have access to the Willamette River for water sports. In researching this subject, I have not found any clear information/research that links boats over 5000 pounds of causing bank erosion. I have witnessed that property owners have not used good bank vegetation practices to help with the erosion.

I do not support the proposed regulation.

I would like to see better enforcement of the existing regulations.

Sincerely,

Connie Delaine Barnes
