

Submitter: Mary Etzel

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

This bill will destroy all the small farming community and other small business that use diesel fuel for their equipment and trucks, etc. There already has been so much damage because of all the new "laws" and "regulations". If you have NEVER lived or worked on a farm or any industry that uses diesel fuel for equipment or vehicles you should not be trying to vote stuff in that's will effect these industries and peoples livelihoods. Diesel fuel has been around for years longer then most that are trying to vote in to remove the use of it and it has not done any harm! Batteries and electric do more harm to our environment then diesel fuel. All the waste of good working equipment and vehicles will be wasted due to this bill and that is not ok. That's hurting the environment. Please do not pass this bill. Many will be hurt by it versus being helped. Think before you act and really think about things with an opened mind what this bill will really effect! Maybe your own family and their job could be in jeopardy if this bill goes through.

Thank you for your time

Mary
