

Submitter: Joe Stinnett

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

Members of the Oregon Legislation,

I'm writing in opposition to this bill that would require renewable diesel. We have made great investments in our equipment to burn cleaner than ever before. We use def for acregen unit that in turn leaves little to no carbon.

There isn't even an infrastructure in place currently that would be able to take over the fuel we currently use.

It's just a feel good idea that someone that's making this fuel needs you to believe. This way they sell their product!

Thank you for your time! Again I urge to vote no

Sincerely

Joe Stinnett
