

Submitter: Brandon Dessart
On Behalf Of: Tip of the triangle farm
Committee: Joint Committee On Transportation
Measure: HB4141

We had to transition to the use of tractors due to the lack of willing workers and the high cost of paying a large crew for what a single tractor can do. I fully understand the need to progress toward renewable resources but not at the expense of all Oregonians. If this bill passes many of us will be out of business. With less farmers comes less food and higher prices on nearly all grown foods. I doubt the state could handle such a situation as this time.
