Committee: Joint Committee On Transportation

Measure: HB4141

Opposed

Please do vote to pass this bill. Oregons people cant afford to take giant risky leaps when it comes to their livelihoods and ways of life. Work to bring in renewable fuels. Get it into areas all over Oregon. Let people see if they like it. If demand is high, and needs can be met, we will change over. Dont force this.

We are tired of being forced into everything. Especially things that will surely push many right out of business when the demand for diesel cant be met and we are left with out jobs and homes.
