

Submitter: Cliff Dougherty

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

I oppose this bill. Oregon needs to realize that it isn't just cars in the cities that get people from one point to another. The system is not to the point where we can do away with machinery that operates on diesel fuel, including farm equipment, trucking, and airplanes. These machines, including trucks are how the cities get supplies to feed the people in the cities. I operate a farm and raise wheat and cattle. We cannot operate without diesel. It is necessary for me to operate on a day-to-day basis, including tractors, combines, trucks, sprayers, airplanes; and the list goes on and on. You must not vote this in!
