

Submitter: Jim and Jill Gielish

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

We personally own a diesel pickup truck and share a diesel orchard tractor with family members. Both are properly maintained. Several other family members also own diesel trucks and cars and also farm equipment. Banning diesel would be devastating for us. Banning diesel would destroy farmers and truck drivers. It would be impossible for us to replace our equipment. We strongly oppose the ban of diesel. If we are forced to switch to electric, that's worse for the environment as all those dead batteries end up in landfills which will pollute far worse, even polluting waterways. Do not ban diesel.
