

Submitter: Courtney Shelburne

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

My name is Courtney and I am a fourth generation farmer in Oregon, in addition to farming with my husband and his family. We rely on transportation and diesel fuel to power farm equipment, trucks, tools and so much more. Without trucks, we are unable to transport our products to consumers in any way. We need diesel to continue to provide for the 98% of people that are not involved in agriculture, and even the remaining 2% relies on diesel for some sort of transportation, medical needs, putting products on shelves, deliveries and SO MUCH MORE. Please keep your local farmers in mind during this time, we all rely on diesel.
