

Submitter: Kathy Mussi
On Behalf Of: Self
Committee: Joint Committee On Transportation
Measure: HB4141

This is crazy. People who are farmers and ranchers need diesel fuel to do their jobs and to supply food and goods for all of Oregon's citizens! It sounds to me like Oregon legislators have an agenda against the citizens of Oregon. While this won't affect most of the citizens, it will affect the food and the goods supply that they all rely on. Why does our State government think its a good idea to constantly punish the citizens of Oregon? What truly could be your agenda other than extermination of the people who feed us and make the goods we need to live. If you want to go green, then lets get companies who can provide green services to come to Oregon. Then let the people choose who will that wish to go green to go green. Stop punishing our citizens for your own agendas.
