

Submitter: Alexandra Bruckner

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

I strongly oppose HB 4141. This bill will effectively hamstring the working class and the backbone of this state. What do you expect will happen to the supply chain when truckers, loggers, farmers, and construction workers are not permitted to use their machines due to the fuel they use? There is not currently a new way to accomplish the work these people do with a different fuel source. Until you can come up a reasonable alternative, do not move forward with this bill.
