

Submitter: Trina Kelley
On Behalf Of: Self
Committee: Joint Committee On Transportation
Measure: HB4141

Industries will not be able to absorb the costs of removing diesel driven machines, trucks and equipment until there are affordable, reliable, efficient replacements for what they are currently using. Do you know if all can even be developed without diesel. There may be some developed for use but not all are there yet. Work that end out first.

Don't TAX and penalize them into changing course. Find a tax or funding somewhere else that will help fund the production of new equipment.
