

Submitter: Ryan Bizeau

On Behalf Of:

Committee: House Committee On Health Care

Measure: SB1529

Thank you for taking to the time to recognize my opposition to SB 1529. In the last two years we have watched executive branch offices enforce rules that were generated within the executive branch, bypassing the leaders elected by the people. This disregard for a balance of powers was on display as a legislative committee called OSHA in and was told that OSHA doesn't have to answer to the legislature. States of Emergency declared by the executive branch or office there under should be limited and be overseen. This donation of power isn't healthy. Vote no and allow longer changes in the function of the State to remain with elected officials. Thank you.
