On Behalf Of:

Committee: House Committee On Environment and Natural Resources

Measure: SB1589

Our public water ways are for everyone and should be for every legal usage. There is no justification for the termination of certain boat types outside of individual bias, which is unjust.

There is no statistical data or evidence to the negative claims made concerning wake surf boats and the environment, it is unfounded conjecture. Furthermore a 15,000 cabin cruiser that produces a wake far greater than any wake surfing boat can still operate freely under this legislation. This is a biased attempt to negatively impact one sole group of river users without data and the unlikelihood of any real benefit.
