Committee: House Committee On Environment and Natural Resources

Measure: SB1589

Please support SB 1589. This bill is long over due and we need some reasonable controls in the Newberg Pool. The OSMB hasn't been able to effectively address this issue and therefore it has been brought to legislature to be vetted. The science is there that confirms this narrow stretch of the river cannot withstand the impacts from these machines. There's a reason 757's can't land at the Aurora Airport because they are just too big and the same logic should be applied to boating in the Newberg Pool.
