

Submitter: Dan Grimes

On Behalf Of:

Committee: House Committee On Environment and Natural Resources

Measure: SB1589

Now, more than ever we need an outlet to spend time with our families. Any boat capable of towing correctly and producing an enjoyable wake easily weighs more than 5000 pounds, even smaller ones. An engine alone is 1000 pounds, people and gear can be 3000 pounds, and the rest of the craft, running gear, stereos, swim platform would far exceed 5000 pounds when combined with the engine, people, and gear. 5000 pound limit is silly.
