ANALYSIS

Higher Education Coordinating Commission Apprenticeship Report

Analyst: Walt Campbell

Request: Acknowledge receipt of a report from universities and community colleges on outreach efforts to women and minority individuals and the amount of work performed by apprentices under qualified contracts.

Analysis: Apprenticeship utilization requirements began with SB 5505 (2017) which included a provision that the Knight Campus project at the University of Oregon (UO) require contractors and subcontractors to employ apprentices to perform 15% of the hours by workers in apprenticeable occupations; develop a plan for outreach, recruitment, and retention of women and minority individuals; and report this information annually. Requirements were expanded and modified in the 2019 session (SB 455) and specific utilization targets were applied to public university projects approved in the 2020 second special session (SB 5721). Four university projects were approved in SB 5721 and their status in relation to the apprenticeship requirements are detailed below.

Boivin Hall (Oregon Institute of Technology) is a project to completely renovate a building on the Klamath Falls campus. Work involves a significant systems overhaul, seismic retrofit, building envelope replacement and foundation repair, in addition to an interior remodel. The project is in the early stages, so there are no signed contracts over the \$200,000 threshold for apprenticeable trades and no hours have been worked by subcontractors.

Arts and Education Complex (Oregon State University) involves a new two-story structure along with an improved parking lot and green space; most work to date has been design and site preparation including demolition of the old Facilities Services Complex. Apprenticeships hours by contractor and subcontractor constitute 11% of the work performed.

Vernier Science Center (Portland State University) entails renovating and expanding the usable space of a six-story, 92,600 square foot building. The only work to date has been demolition. Apprenticeships hours by contractor and subcontractors constitute 7% of the work performed.

UO's Huestis Hall is a renovation including building envelope replacement and systems overhaul, as well as modernizing laboratory and learning spaces. Since UO had an earlier project subject to apprenticeship reporting, it is better prepared to comply with the requirements and capture the necessary data. Of the limited work performed so far, 15% has been by apprentices and 8% by minority individuals.

All four university projects are currently in the early stages, so the metrics reported to date have limited meaning. The main value of the current report is to show the universities and contractors are aware of the requirements, have a plan to comply and a process in place to capture the necessary data. Reporting by the universities should be more robust in 2023.

Recommendation: The Legislative Fiscal Office recommends acknowledging receipt of the report.

Higher Education Coordinating Commission

Office of the Executive Director 3225 25th Street SE Salem, OR 97302 www.oregon.gov/HigherEd

January 18, 2022

Senator Elizabeth Steiner Hayward Representative Dan Rayfield Joint Interim Committee on Ways and Means 900 Court Street NE H-178 State Capitol Salem, OR 97301

Dear Co-Chairs:

ORS 350.379 requires public institutions of higher education to report to the Joint Committee or Interim Joint Committee of Ways and Means Prior to February 1 of each year on the amount of work performed by apprentices, women and minority individuals under qualified contracts, as defined by the same section. Please find attached reports submitted on behalf of such institutions for acknowledgement during the February session. Our submission is procedural; therefore, any questions about the content of the report or the status of institutional compliance are best directed to the authoring institutions.

The attached information is submitted on their behalf, and we request the Joint Committee take action to acknowledge the receipt of this information.

Sincerely,

Ben Cannon Executive Director

Subject: SB 5721 (2020) Apprenticeship Report

Date: January 25, 2021

Dear Legislators,

During the second special session of 2020, the State of Oregon invested in four public university capital construction projects including the Oregon Institute of Technology's (Oregon Tech, the University) Boivin Hall Rehabilitation (the Project). Boivin Hall was built in 1976 and has not seen any major renovations in that time. It includes the University's only chemistry labs which are critical for STEM and Health programs and is a critical building utilized by all undergraduate students on the Klamath Falls campus. Increasing class/lab space and modernizing the facility will expand the total capacity of Oregon Tech to graduate high demand engineering and healthcare professionals.

This report includes the legislatively mandated reporting requirements, details of the Boivin Hall Rehabilitation project, apprenticeship hours to date, and information on the Southern Oregon Joint Apprenticeship Training Council. Future reports will detail the remainder of the progress towards the building's completion and more detailed information on the apprenticeable hours worked through the Project's expected completion in December 2022.

Background

SB 5721 (2020) requires that on or before February 1 of each year, the University report to the Joint Committee on Ways and Means or Joint Interim Committee on Ways and Means on the contract value and total hours of work performed by apprentices, women, minority individuals and veterans and the types and costs of health insurance and benefits provided to workers by contractors and subcontractors.

SB 5721 (2020) provides \$19,615,000 in state funded bonds for the Boivin Hall Rehabilitation Project on Oregon Institute of Technology's Klamath Falls campus. The bill requires that in all qualified contracts the University require contractors to employ apprentices in "apprenticeable occupations", to perform 15 percent of the work performed under the contract. The provisions of the bill only apply to contracts with an estimated cost of \$200,000 or greater. The bill also required the University to establish and execute a plan for outreach, recruitment, and retention of women and minority individuals to perform work under the contracts.

Summary

This report is for the period of October 25, 2021 through January 6, 2022. The total number of contracts of \$200,000 or more during the reporting period with apprenticeable trades post-implementation of the Project Labor Agreement (PLA) was 0. To date, no hours have been worked on the Project using subcontractors as the Project is still in the design and budget review phase. The Project is estimated to be completed in December 2022.

Project

In August 2020, the Oregon Legislature approved \$18,560,000 Article XI-Q bonds to finance \$18,270,000 of project costs and \$290,000 for costs of issuing the bonds and \$1,055,000 Article XI-G bonds to finance \$1,015,000 of project costs and \$40,000 for costs of issuing the bonds to completely renovate Boivin Hall on the Klamath Falls campus of the Oregon Institute of Technology. The Project budget also includes \$1,015,000 of University funds, the required institutional match to Article XI-G bonds. Total Project budget is \$20,300,000.

The Project also includes seismic retrofit; mechanical, electrical, and plumbing replacement; building envelope replacement; foundation repair; and full interior (classroom and lab) remodel and modernization. Improvements to surrounding areas, including ADA accessibility sidewalk, transportation, and landscaping are part of the Project scope.

Project Labor Agreement

On May 24, 2021 the Oregon Institute of Technology and Adroit Construction Co. (Adroit) in their capacity as construction manager/general contractor (CM/GC) signed the PLA.

Report

Section 15 of SB 5721 (2020) requires the Oregon Institute of Technology to:

- a) Employ apprentices to perform 15 percent of the work hours that workers in apprenticeable occupations perform under the contract, in a manner consistent with the apprentices' respective apprenticeship training programs;
- b) Establish and execute a plan for outreach, recruitment and retention of women, minority individuals and veterans to perform work under the contract, with the aspirational target of having at least 15 percent of total work hours performed by individuals in one or more of those groups;
- c) Provide health insurance and retirement benefits to workers; and
- d) Require any subcontractor engaged by the contractor to abide by the requirements set forth in paragraphs (a), (b) and (c) of this subsection, if the work to be performed under the subcontract has an estimated cost of \$200,000 or greater.

On or before February 1 of each year, each public university that is carrying out a qualified project shall report to the Joint Committee on Ways and Means or Joint Interim Committee on Ways and Means, as part of the report required under ORS 350.379, on:

- a) The amount of work performed on qualified projects by apprentices;
- b) The amount of work performed on qualified projects by women, minority individuals and veterans; and
- c) The types and costs of health insurance and retirement benefits provided to workers by contractors and subcontractors.

Establishment of Southern Oregon Joint Apprenticeship Committee

In March 2021, the Southern Oregon Joint Apprenticeship Training Committee (SOJATC) presented their application for registered apprenticeship status to the Bureau of Labor and Industries and the Oregon State Apprenticeship Training Council. The SOJATC is a collaborative effort of Bogatay Construction, Inc.,

Modoc Contracting Co., Adroit Construction Co., Inc., Massey Interiors and Summit Certified Home Inspections with a goal of improving the local workforce and economy through providing an apprenticeship training program for carpentry, cement masonry, painting, drywall and exterior interior specialist.

The program will be facilitated locally through Klamath Community College, and through Rogue Community College in Jackson/Josephine County. The program began classes in Fall 2021, with complete roll out anticipated by Spring 2022. Klamath Community College is also in the process of establishing an accredited Associates in Construction Trades with these five occupations, which was approved by the Oregon Bureau of Labor Statistics in March 2021.

Adroit Construction, the CM/GC for the Boivin Hall Rehabilitation project, is a charter member of the SOJATC and will work in coordination with local subcontractors throughout the construction process to require that at least 15 percent of work done in apprenticeable occupations for all qualified contracts above \$200,000 is done by apprentices. Adroit Construction is also actively involved with recruiting apprentices and promoting apprentice outreach in Central and Southern Oregon.

Apprenticeship Rates in Qualified Contracts

The Boivin Hall Rehabilitation project is in the early stages of construction planning, most recently having undergone the budget review and evaluation of project cost stage. Work associated with the Project does not have any apprenticeable trades for this reason. Overall, for the reporting period there were 0 total number of hours worked on qualified apprenticeable occupations for the Boivin Hall Rehabilitation Project. There have also been 0 total hours worked by women, minority individuals, or women under this contract for the reporting period.

Adroit Construction provides employee health benefits through Regence at a cost to the CM/GC of \$575.10 per month and offers additional benefits for child, spouse, family insurance plus dental, and vision option. Adroit provides a 401(k) retirement plan with a 2 percent match on a 4 percent employee contribution.

To: Joint Committee on Ways and Means

From: Oregon State University

Subject: SB 5721 (2020 2nd Spec) Report on the use of apprentices, minority individuals and

women in qualified capital projects.

Date: January 14, 2022

Dear Legislators,

This report will update you on the status of the OSU Arts and Education Complex (AEC), addressing those reporting requirements established in ORS 350.379 and SB 5721 (2020 2nd Spec).

The AEC will create a prominent new gateway building to OSU on the southeast side of campus, with a new two story structure, improved parking lot, and greenspace. The project will bring together programs in the arts, including music, theater, the visual arts, and digital communications arts, creating a thriving center of creativity infused with science and technology. Preparation for the construction includes the demolition of the old Facilities Services Complex, including the removal and remediation of the abandoned underground fuel tanks.

Funding for this \$70 million project consists of \$35 million of state-paid bonds and \$35 million from universities resources (gifts). To date, approximately \$5.9 million (8.4% of total project costs) in university funds have been spent. Bond proceeds have not yet been used. Much of the work to date has been design and site preparation. You can see this project is in its very early stages; thus reporting metrics will be minimal. We expect next year's report to be more robust.

Work performed by apprentices

Attachment A is the apprenticeship participation from the project's general contractor, Hoffman Construction Company. Apprenticeships hours by contractor and subcontractor constituted 11% of the work performed in 2021.

Work performed by women, minority individuals and veterans

Attachment B is the forecasted participation of women, minority individuals, and veterans as the project progresses.

<u>Types and costs of health insurance and retirement benefits provided to workers by contractors and subcontractors</u>

This information has been requested. The general contractor has confirmed that for every subcontract over \$200,000 (which is most of them), the subcontractor does provide health insurance and retirement benefits.

To: Joint Committee on Ways & Means

From: Portland State University

Subject: SB 5721 (2020) Apprenticeship Report

Date: January 10, 2022

Dear Legislators,

During the 2020 legislative session, PSU was awarded \$45,585,000 in Article XI-Q Bonds and \$5,105,000 in Article XI-G Bonds for the Renovation and Expansion of Science Building 1. This project will transform Science Building 1 into the Vernier Science Center (VSC). The new VSC will meet a critical need for PSU, creating a model teaching facility for a university that leads all other public universities in Oregon in the education of first-generation students, Underrepresented Minorities (URM), veterans and Pell Grant recipients.

The VSC Project will renovate a six-story, 92,600 square foot building, transforming a space that is primarily used for research into a building focused on undergraduate teaching and student success. The VSC Project enhances opportunity and equity for students whose future career goals match two of the state's key occupational areas, health- and STEM-related fields. The VSC Project will support these students by replacing outdated instructional modalities, such as fixed-configuration classrooms, and ill-suited research labs, with flexible active learning classrooms, accessible undergraduate laboratories, and light-filled collaborative learning spaces.

Background

SB 5721 (2020) requires that on or before February 1 of each year, Portland State University report to the Joint Committee on Ways and Means or Joint Interim Committee on Ways and Means on the amount of work performed by apprentices, women and minority individuals under qualified contracts. Additionally, the bill necessitates that in all qualified contracts the University require contractors to employ apprentices (in "apprenticeable occupations") to perform 15 percent of the work hours performed under the contract. The provisions of the bill only applied to contracts paid for with bond proceeds, and that exceeded \$200,000. The bill also required the University to establish and execute a plan for outreach, recruitment, and retention of women and minority individuals to perform work under the contracts.

Summary

This report is for the period 07/26/2021 (date Skanska, the project general contractor, signed their first work agreement) through 11/28/2021 (last billing by Skanska). The total number of contracts in that period with apprenticeable trades exceeding \$200,000 is four. Of these one had work completed, but that work was for demolition and did not use bond funds. The low numbers reflect that this project is only just beginning.

Report

Section 15 of SB 5721 (2020) requires Portland State University to:

- Establish and execute a plan for outreach, recruitment, and retention of women and minority individuals to perform work under contracts funded with bond proceeds, and
- Employ apprentices to perform 15 percent of the work hours that workers in apprenticeable occupations perform under the contracts funded with bond proceeds.

For the purposes of these reporting requirements, "Qualified contracts" means contracts that:

- (A) Are for improvements to real property in connection with the Portland State University's Renovation and Expansion of Science Building 1;
- (B) Have a cost that, at the time the contract was executed, was estimated to be greater than \$200,000; and
- (C) Are to be paid from proceeds of bonds issued under Article XI-G or Article XI-Q of the Oregon Constitution.

Outreach Efforts

As we have limited self-perform work on the early construction packages, Skanska's plans for outreach have been communication prior to bid regarding the diverse contracting and workforce participation on the project. These efforts led to contracting requirements being added to Drywall/Framing/Ceilings, Mechanical/Plumbing and Electrical/Low Voltage scopes, as well as overall subcontractor selection. On this early work, there has been numerous communications with subcontractors regarding both the participation and reporting requirements starting with executed subcontract agreements, preconstruction meetings prior to start of work and more informal communications. Skanska is following up monthly with certified payroll submissions and subcontractor reporting to ensure that reporting is accurate, any questions are resolved, and corrective actions taken to ensure that we meet these objectives.

Apprenticeship Rates in Qualified Contracts

The project has completed approximately 1% of the expected billings as of November 28, 2021. Of that amount there have been no hours billed to bond funds and thus no work covered by the requirements of SB 5721 (2020). However, the project still completed 7.32% of the work to date using apprenticeship hours even though none of that work was required to use apprenticeship hours per SB 5721 (2020). The attached report from Skanska details the work completed to date.

Huestis Hall Renovation Project

Summary Narrative

- Project is in very preliminary stage of construction, as report only represents
- 1. work associated with small projects related to the surge of personnel out of the building so that renovations may occur.
 - Work in report is represented by two contractors serving as CM/GCs for the work included in these surge renovations. The primary project, once
- 2. construction starts will be performed under the Mortenson Construction CM/GC contract
- Reporting timeline was such that subcontractor data for many of the reporting elements was not able to be collected for the month of December. That information was just being submitted to the CM/GC as this report was due.

 Reported data was the information available to us at this time. As work is just
- 4. getting underway on these construction efforts, more information will be available when reported upon next year.
- 5. Reported information includes trade workers only, not management personnel associated with either the CM/GCs, nor the subcontractors.

Huestis Hall Renovation Project

Report only contains work associated with effort related to surge space renovations, as the major project has yet to start construction

Work performed under the CM/GC Contract with Mortenson Construction

MEMORANDUM

To: Jim Pinkard, HECC

From: Karen Smith

Date: January 24, 2022

RE: ORS 350.379 Reporting Requirements and Community Colleges

The following information is provided in response to the ORS 350.379 reporting requirements for qualified community college construction contracts funded in part or in whole by Article XI-G bond proceeds. The reporting requirement for community college projects applies to qualified contracts solicited or advertised on or after January 1, 2021, or if not solicited or advertised, when first entered into on or after January 1, 2021.

There were four community college Article XI-G bond sales in Spring 2021 related to approved Article XI-G projects. The total cost of two of the funded projects were under the \$ 8 million threshold (Southwestern Oregon CC and Klamath CC) thus these two colleges have no qualified contracts subject to the ORS 350.379 requirements.

Portland Community College's Heath Tech Building renovation project was initiated with local bond funds and the construction contracts were entered into before the January 1, 2021 effective date so the new reporting requirement does not apply to PCC at this time.

Construction on Lane Community College's Health Professions Building, which will be funded in part by Article XI-G bond proceeds with a total project cost over \$8 million, has not begun and therefore there are no qualified contracts to report this year. Construction contracts are anticipated to be entered into this spring and may be subject to next year's reporting cycle.

Please let me know if you have any questions or need more information.
