

Please accept the following opinion when you evaluate the status of measure 110. I am inclined to appeal this law. It really has compounded the unbelievable problems that plague Portland and the entire state. From day one when I heard about this measure I just knew it would promote more harm than good. I did not vote for it. Now I see the effects daily. It's a sad reality of a failed law. I see thousands of people so disconnected from reality due to drug use. They are not part of society and the actions they take are a huge drain on limited resources. This needs to be totally appealed. I really want to see Portland and the state on a return to livability. This does not allow that, but rather compound the recovery. I travel often and do not see as much overall dysfunction as I do in Portland. It's really a leadership issue and repealing this would help move us forward. I've never been so displeased with the community I live in, to the point of wanting to move out of state. Thank you for listening. James Aspros
