

I appreciate the intent of m110. I voted for it but it's obvious it is not working as expected. 1) Please ban public use of hard drugs and 2) there has to be consequences if people caught with drugs don't choose treatment- real consequences- please enact some.

People in the midst of drug addiction aren't in the right frame of mind to voluntarily choose treatment. And if someone doesn't want to undergo treatment, that's fine- it's their choice, but they then should face justice system.

And stop making me watch someone smoke fentanyl in public. It's adding insult to injury and negatively impacting neighborhood safety, security, and economic viability.

thank you
Frank Blackston
