

Dear law maker/representative,

I made a mistake. I voted for Yes for measure 110.

I had no idea that this would lead to the wide spread problems we are now seeing in our communities.

Drug dealers operating in the open with impunity distributing dangerous drugs.

Drug users and drug addicted using at unprecedented and increased rates out in the open impacting the livelihood of local businesses and the civic pride of local communities.

Increase in the homeless population due to the "culture of permissibility" that measure 110 has emboldened.

Please take legislative action now and reverse the devastating effects that measure 110 is having on our communities.

Make dangerous drugs like fentanyl, heroin, etc. illegal now!

Make the consequences for dealing and using these drugs severe. Send a message to drug dealers, and those afflicted with addiction that there are consequences to distribution and use of such illegal drugs.

Empower law enforcement and make penalties severe so that we can clean up this mess and restore Oregon back to the livelihood previously known.

Please Be honest with yourself and your fellow lawmakers. The various government agencies and their affiliates do not have the conviction, education, resources, or expertise to manage the failed policies of measure 110.

The one percent (6k homeless and drug addicted ) are ruining the community. Stop making policies that empower the minority of community members to continue their dysfunction at the detriment to the majority.

Sincerely,

Darin Gardner.
