

I am completely at a loss of words with what our city has dwindled down to. Walking into a grocery store with my six year old where people are openly smoking drugs in the doorway is completely hazardous. The fact that businesses are not comfortable approaching these people doing these harmful things is putting everyone at risk. I do not want my child exposed to this stuff and neither does anyone else. When is enough enough! I've seen people openly using in their cars with windows rolled up and children in the backseat. Repulsive! I see police drive by big groups at the max clearly smoking drugs on the public transit platform where there are families just trying to use the public transportation. This is so harmful to our community and it needs to stop.
