

Dear Govt representatives,  
As a resident of outer SE Portland, I want to express my objections, first to having a toll imposed on I-205 use at all and second to having the toll be a resource for expansion of freeways. As a low income resident who uses public transport and needed mobility assistance, I prefer that we use such toll monies and tax funds to improve accessibility on public transportation. We need to continue to improve maintenance of current roads and to increase safety of those roads more than we need to expand freeways. I stand with other members of Apano and support representative Khahn Pham's position on these issues.

Respectfully,
