

Hello,

What could you be possibly thinking... legalize drugs, defund the police, allow people to live on the streets...

Mark Twain said the problem with "Common Sense" is that it isn't so common! Would you give a baby some gasoline to drink... of course you wouldn't. The baby doesn't know any better and can't help themselves to protect themselves. A drug addict is in the same boat... they can't help themselves so don't give them any gas to drink... drugs to use.

I know you are following the leader or somehow thinking you are doing the right thing but can't you see (it's right in front of your eyes) that these left wing radical "let's try everything - let's spend money that we don't have and hold no one accountable for the money" approach that has been in place for the last 4 years is NOT WORKING!

Stop Ruining Portland. My family used to love it here... we want the safety, beauty and decency to come back... but we will be moving to another state if things don't change.
