

I have to say that this city is no longer my city.

I went on a field trip with my 8th grader to the Chinese gardens recently where we were yelled at by a woman on the streets telling us to stay away that she had meth on her and yelling obscenities at the students and teachers! After that I had to block the kids from stepping in the human poop that was on the street so that they could get back on the bus. This is not ok!

We were supposed to have another field trip downtown after this and my son did not want to go because of our last experience. He missed out because he didn't feel safe.

My husband had an employee embezzle thousands of dollars from his company to pay for her drug addiction. Making it legal is hurting the tax paying small business that this state is not protecting! We are very close to closing the business and moving elsewhere because of how this has been going. This is not working! Other states are shipping them here and it's becoming a much bigger problem! Do better and fix this!

Krystal
