

Initially I was in favor of decriminalization but the net result has been a state over run with addicts not taking advantage of treatment option. It is negatively effecting our community and commercial enterprise which ultimately funds the programs. This downward spiral must be fixed. I really like the word "fix" because it leaves room for a middle ground or third option. We need laws to curb drunkenness in public and use of drugs like we're talking about with real enforcement, mandated rehabilitation first. If they fail or drop out of rehabilitation three times then they will need to be institutionalized. I don't hate homeless people or drug addicts. In fact the reason I'm writing is because I care deeply. They need real help and forced rehab. It's the only caring thing to do. Otherwise they suffer and prey on each other and society. Literally when I see a Zombie movie it reminds me of our indigent community roaming around the streets, not in their right minds, preying on society and even each other. When you hear the stories from women and the weak living that lifestyle! They are being abused on the streets, campgrounds and camps. Please help them by fixing Measure 110.
