

To whom it may concern:

I have many issues with measure 110. My chief concern is the lack of enforcement in Portland. On many occasions my children and I have witnessed people using drugs out in the open and we have been exposed to smoke from illicit and dangerous drugs because of this. The max train no longer smells or feels clean and safe. The other major concern I have is with prosecution. People are starting off with lower than necessary charges and pleading down yo misdemeanors for serving and selling drugs on our streets. The rampant selling and using of drugs has led to a less livable community. That is putting it lightly. I am disgusted by the way this city and state looks. Beautiful areas are becoming run down and unusable. Our sidewalks are littered with drug paraphernalia. It's unacceptable and this entire measure to be repealed and rewritten. I have not seen any evidence of treatment being given to people who need it most. Our mentally ill are being neglected. 110 has been a failure and it's time to admit it and do better.
