

Hello - I am writing to testify that I support tolling but only if revenue is shared with local partners and if they directed to public and active mobility, not expanding highways which will only induce demand for more passenger vehicle trips.

Congestion pricing is a great strategy and should be implemented. I am living in Portland, and raising my family here because it's a place we can feel comfortable walking and biking. Further investment in highways and worsening pedestrian / cyclist conditions post a threat to our being here and I am sure we are not alone.
