

I thought I was voting only for the legalization of marijuana but this measure goes way way too far. I now have drug addicts breaking the door window of my building, peeing and literally taking a crap on the street or in a parking lot I can see from my unit. I am a Viet Nam disabled vet, I don't scare easily, but this has become untenable. Everything associated with the homeless and drug addiction has been dumped into old town. I watch drug deals every day from my window or walking to the store. The tents have made some sidewalks impassable. This needs to change and could start by cleaning up
