

Please repeal or fix 110.

This is my personal experience how 110 has ruined my city Portland.

I went downtown last summer to support the new beer garden and carts on Harvy Milk Street. My husband and I parked 3 blocks away, paid for parking and began our decent into hell. We passed open fentanyl use and sales. At one point a green Jeep no plates pulled up at the corner and began to openly sell fentanyl. I guessed it was fentanyl because one lady was literally running waving her aluminum foil at the driver. I wanted to support the owners of the carts and the garden because I want our downtown to recover. I am also always looking for food places that can accommodate my large family of 17. I have 10 grandchildren in my family so anyplace we go has to be safe and drug free. We do not want to expose our children to drug use and passed out addicts. Needless to say my family never went to the beer garden together. This is just one story of hundreds of incidents of open drug use and sales I have witnessed since the passage of BM 110. It is ruining our state. The experiment has failed. Let's get to work to fix our State!!!
