What do you want to tell legislators about the proposed \$1.9 Billion Rose Quarter Freeway Expansion and Oregon's transportation system?

Greetings! Thank you for taking public testimony. I encourage you to reconsider how to address traffic congestion through the rose quarter. It's vital to do an EIS study to consider the impacts of this plan on our community and the climate crisis. This is not a time to do everything like we used to do. We need solutions that will bring our community together, address congestion, and mindful of our climate crisis. We need bold thinkers and leaders who will solve problems that will enhance our air quality as well as our life in the city. I urge you to not go forward with this plan without an EIS study to consider what plan is best for our community and has the least negative impact on our climate. Thank you.
