What do you want to tell legislators about the proposed \$1.9 Billion Rose Quarter Freeway Expansion and Oregon's transportation system?

The research is unequivocal – we are in state of humankind induced global warming. That being said, even if some of us wish it could be sated or even stopped; capitalism will continue to demand growth. But does that mean growing our freeway system – impacting our community and creating even more carbon producing traffic – couldn't we invest in public transportation and other forms of efficient mass transit that would both improve our the wellbeing of our community while allowing for continued economic growth?

I urge ODOT to conduct and EIS on the proposed freeway expansion. Let's work toward better future.
