

I live in the city of Portland and want to see open air drug use and drug possession outlawed again in order to force drug users into treatment and get them off the streets. I do not feel safe on the streets of my own city and know that others feel the same. I have watched businesses and neighbors fleeing downtown Portland and believe we are in a death spiral. My son is about to graduate from Lincoln High school downtown and if things do not start to improve soon, we (and our tax dollars) will be leaving Portland.
