

BM110 drug legalization is a major cause of our homeless problem in Oregon, and it is time stop the continuous damage.

Show you care about the people that work 40 hours per week and for months come home to a someone camping out in front of their house.

The city cleans it up and in a few more months there's a new camper.

What about the environmental damage to sensitive areas like flood plains. Take a field trip to one of the flood plains and see what is there before the clean up crew starts. You will see is what goes in the river and out to the ocean. Is it ok for cars to drive around without catalytic converters?

Everything in stores cost more due to increased security costs and shoplifting. Especially in lower income areas.

Property taxes going up while public services decline because so much of our resources are spent trying to take care of the problem.

It is time to make ALL of the communities in the state safe NOW, not a year from now!!!!

BM110 is causing more harm than good. It is time to repeal the measure until solutions are found.

Good hard working people that are living with the campers in their yard need results NOW, not another year of talk.

Jim Braet

Resident of Portland for almost 50 years I was proud of city of Roses, It has now the city of Trash due to bad policies
