

I'm writing from central Oregon, here in Bend we have homeless drug addicts wondering the streets, trashing the land, making it unusable for individuals and families, we can no longer use a lot of the national forests and BLM lands. In town we can't get from one side of town to another without on foot or bike without having to go past sketchy homeless camps and strewn trash all around. My wife and I recently started a family and may leave Oregon if this doesn't get better to go somewhere safer and less of a free for all, this is unacceptable. We moved here five years ago and it was the cleanest, safest, most beautiful place I've ever seen, since Measure 110 was passed this state has been in a downward spiral, help us recover before it's too late, immediately repeal 110, thanks, The Clark's Sent from my iPhone
